OBJECTIVE

To contribute to the Performance and Talent Development team at BC Pension Corporation by leveraging Microsoft 365 tools, data analysis, and process improvement to support talent programs and enhance employee experience.

KEY QUALIFICATIONS

- Proficient in modern Microsoft 365 tools (SharePoint, PowerApps, Teams, Excel, Word, PowerPoint) to streamline workflows, organize data, and improve team collaboration.
- Experience researching, testing, and implementing digital tools and process improvements to solve complex organizational challenges.
- Strong communication and organizational skills, demonstrated through creating clear SOP documentation, managing projects, and leading team initiatives.
- Demonstrated leadership and communication skills as project lead for a capstone project and Chair of the Camosun Technology Symposium.

RELEVANT SKILLS

- **Productivity & Collaboration:** Microsoft 365 (Teams, SharePoint, Excel, Word, PowerPoint, Outlook), PowerApps, Power Automate, Google Workspace
- **Data & Process Improvement:** Dataverse, SQL, Python (Pandas, ETL), Workflow Automation, Requirements Gathering, Data Normalization
- **Communication & Administration:** SOP Documentation, Technical Writing, Program Coordination, Cross-functional Teamwork
- **Software Development:** Python, C#, C++, JavaScript, Java, Swift

EDUCATION

Camosun College

Victoria, BC

Diploma in Information and Computer Systems Technology

September 2024 – Expected August 2026

- **Honours & Awards:** Dean's Honour Roll; Recipient of the 2026 Victoria Innovation, Advanced Technology & Entrepreneurship Council (VIATEC) Award in Computer Science.
- **Leadership:** Elected Chair of the Summer 2026 Technology Capstone Showcase, leading and overseeing the entire event process.

EXPERIENCE

Information Technology Lead

May 2025 – Current

Regional Facilities & Healthcare Contractor (Under NDA)

Victoria, BC

- Direct IT operations, tech procurement, and workflow strategy for a commercial service provider supporting 100+ distributed frontline and administrative staff.
- Engineered low-code mobile Power Apps and Microsoft Lists solutions utilized by frontline workers for compliance tracking and secure key hand-offs across 80+ operational sites.
- Centralized administrative operations by migrating non-normalized legacy Excel tracking sheets into a structured Dataverse data model, streamlining workflows for core office staff.
- Unified endpoint management for a mixed Windows/Apple environment using Microsoft Intune and Google Workspace, securing device deployments and access privileges for field personnel.
- Developed internal SharePoint portals for SOP documentation and interactive tutorials, drastically reducing onboarding time for new administrative and field-support hires.

Systems Technician

May 2024 – April 2025

Mother Computers

Victoria, BC

- Acted as a primary consultant for small business and educational clients, providing systems analysis to scope hardware upgrades, OS migrations, and cross-platform solutions.
- Managed a high-volume service queue as the go-to Apple specialist, prioritizing client needs to ensure rapid turnaround on OS deployments and hardware repairs.

Apple Advisor

October 2023 – May 2024

Best Buy Canada

Victoria, BC

- Provided technical consultation on device specifications and ecosystem integration as a Lead Apple Champion.
- Provided frontline technical guidance to customers and team members, translating complex device setup and configuration steps into clear, accessible instructions.

Dining Room Front of House Support

April 2023 – August 2023

The Butchart Gardens

Brentwood Bay, BC

- Delivered exceptional customer service in a high-volume team environment, developing a deep understanding of The Gardens' operations, staff culture, and high standards for guest experience.

Certified Apple Systems Technician

September 2019 – August 2021

CityMac

Bellingham, WA

- Managed a high-volume repair queue, personally handling over 40% of the department's device throughput while maintaining excellent customer satisfaction through direct client communication.

PROJECTS

Vendor ETL Tool | *Python, Httpx, Pandas, Excel*

2025

- Built an asynchronous web scraping and ETL pipeline to automate supplier data collection, normalize records, and output to Excel with pivot tables, increasing retrieval speed by 15x and saving 90% of manual research hours.

Enterprise MDM Deployment | *Intune, Apple Business Manager, Entra ID*

2024

- Designed a scalable MDM framework supporting Intune and Apple MDM for automated device registration, security policy enforcement, and compliance monitoring, improving organizational workflow.

Monument Unmaking | *Unity, C#, AR, Niantic SDK, AWS, Jira, Confluence*

In Development

- Acting as Lead Communicator and AR Developer for a team-based capstone project to reclaim public monuments through augmented reality; tracking delivery in Jira and documenting decisions in Confluence.
- Developing the AR experience in Unity with the Niantic SDK to anchor 3D digital art to real-world locations, creating a platform for marginalized artists.
- Utilizing a serverless AWS backend (Lambda, API Gateway, DynamoDB, S3) to dynamically serve monument data and 3D models; clarifying acceptance criteria and testability for API-backed mobile features.
